## SUMMARY

Full Stack Web Developer skilled in React.js, Next.js, Node.js, Express.js, and MongoDB, with multiple projects spanning e-commerce, REST APIs, and third-party API integration. Comfortable owning a feature end-to-end — from schema design to a responsive, deployed frontend. Currently deepening full-stack expertise at WsCube Tech, with a strong Git/GitHub workflow and a growing focus on application security.

## PROJECTS

**Nestro — Full Stack Furniture & Interior E-Commerce Platform** *Next.js, React, Tailwind CSS, Node.js, Express.js, MongoDB, Cloudinary*

**Live Demo** | **GitHub**

- Built a full-stack e-commerce platform end-to-end covering product catalog, room-based browsing, and an admin management panel, with a fully responsive Tailwind CSS interface.
- Designed and implemented REST APIs for products, categories, room types, and application data using Mongoose schemas for structured, scalable data models.
- Connected frontend and backend via Axios with dynamic filtering, and integrated Cloudinary for optimized image upload and storage.
- Conducting an ongoing self-driven security review of the codebase, focused on improving route-level authentication and input validation.

**Job Application Tracker** *React.js, Node.js, Express.js, MongoDB*

**GitHub** | **Live Demo**

- Built a full-stack web application to track job applications, manage company details, job roles, application statuses, and notes through a centralized dashboard.
- Developed RESTful APIs using Node.js, Express.js, MongoDB, and Mongoose to handle CRUD operations for job application management.
- Implemented search, filtering, application editing and deletion, and pagination to improve usability and data management.

**NIVARA — E-Commerce Website** *React.js, JavaScript, CSS*

**Live Demo** | **GitHub**

- Developed and deployed a responsive e-commerce application using reusable, modular frontend components.
- Implemented product listings, navigation, and layouts optimized across devices.
- Deployed the application on Vercel for public access.

**GitHub Profile Searcher** *React.js, JavaScript, GitHub REST API*

**Live Demo** | **GitHub**

- Built a GitHub profile search tool that consumes the GitHub REST API to fetch and display user data.
- Displays profile details, repositories, followers, and following in a clean, responsive layout.
- Implemented robust error handling for invalid usernames and failed API requests.
